I currently subscribe and pay for satellite radio service (XM Radio) and am upset that the NAB is trying to limit certain services that XM provides me . These services include localized weather and traffic reports for the various cities i travel thru . I am a Owner Operator (Truck Driver) and rely on these services that XM provides , to better forecast and route my trips , as i enter and travel thru cities in our nation. Local radio stations are not willing or suited to provide these instant reports , nor do they offer such a service on a continuous basis. As a paying consumer and citizen , i don't believe the NAB has any reason or claims in trying to limit what XM provides its consumers. That would be equivelant to telling Cable and Satellite Television Operators , that they can't carry The Weather Channel for fear of local TV Station operators . We pay for these services and it is not the government's position to tell XM what they can and can't carry on their broadcasts. This directly goes against our 1st Ammendment right for FREEDOM OF SPEECH. Please vote accordingly , and let XM continue to provide us consumers, with the programs and services that we've come to rely on , and pay for . Thank You
